## New Xerox Color Laser Printer Taps Internet for Remote Color Printing

### DocuPrint NC60 Offers Unmatched Convenience to Users

ROCHESTER, NY, May 10, 1999 Xerox Corporation is using the power of the Internet to make office color printing as easy as sending e-mail.

The DocuPrint NC60 Color Laser Printer, announced today, has a built-in e-mail receiver that allows users to dispatch print-ready documents directly to it - unlike the Hewlett-Packard LaserJet 4500N color printer. The NC60 also includes more for less: At an estimated street price of \$2,695, the NC60 costs \$200 less than HP and offers a suite of industry-leading convenience features, Ethernet and true Adobe PostScript 3.

"The NC60 is an excellent color laser printer with the most value and convenience the industry has to offer," said Kevin Shea, senior vice president and general manager, Xerox North American Office Channels. "It's fast. It's hassle-free. And it allows workers everywhere - on the road, in the office, on a trip overseas - to print brilliant color documents from their laptop to the NC60, wherever it may be."

Called Remote Printing, this new e-mail feature means users do not have to be connected to their company's network in order to access the printer. Remote Printing also can slash a business' overnight mail or long-distance costs because it essentially enables the printer to act like a high-quality color laser fax. System administrators can configure one NC60 - or a fleet - with a single e-mail as well. Meanwhile, with E-Mail Alerts, users don't need to monitor the printer's toner or paper supplies. When supplies run low, the NC60 will notify users via e-mail. In time, these features will be extended across the entire N Series monochrome laser printer line. No other printer family makes it so easy to print documents from anywhere around the world.

The business color printer retains all the best features of its award-winning predecessor, the DocuPrint C55, while significantly boosting image quality, speed and productivity. It is also remains the industry's smallest, sleekest color laser printer.

Full features, fantastic print quality

The NC60 combines these innovative Internet-enabled features with technology advancements that produce superior color print quality. Exclusive features include IntelliRes, which smoothes coarse Web images; ImageFix, which corrects picture brightness or poorly scanned images; ZipColor, which makes color jobs print faster; and Hold Job, which gives users extra time to load special

paper.

As part of the N Series laser printer family, the NC60 also contains Xerox WorkSet technology, a combination of controller and software solutions that enable multiple set printing and collation without tying up the network.

In addition, the NC60:

1. Prints up to 4 pages per minute color and 16 ppm monochrome.
2. Contains a new-generation powerful controller with true Adobe PostScript 3, (unlike HP's newer desktop printers), and PCL 5C emulation.
3. Has built-in Ethernet and three additional connectivity ports.
4. Ships with 64 MB of standard memory (expandable to 128 MB) and supplies.
5. Improves its predecessor's print quality with 600 x 600 dpi resolution in black and color, and standard "1200 Image Quality" enhanced image mode.
6. Offers an optional hard disk and media server.

#### Warranty, Availability

The DocuPrint NC60 Color Laser Printer comes with one-year onsite service and Xerox' Total Satisfaction Guarantee. It is available immediately through resellers and distributors in North America and Europe, and other markets will follow thereafter. For details, call (800) 34-XEROX in the United States or (800) ASK-XEROX in Canada.
